**Subject:** 508 compliant Dimock pdfs

Hi John,

Attached are 508 compliant versions of 3 pdfs dealing with Dimock.

For the first two, note that I inserted dashes where there are now blank spaces. The reason is, as you can see below, blanks can show up as %20. Besides being confusing, this can mess up websites that use Content Management Systems. I also replaced upper case with lower case letters. Some browsers are picky about case. For instance, typing in ...dimock.pdf might give you a broken link if the file is saved as ...Dimock.pdf.

All that said, if you think that changing the file names will create a lot of broken links, just change them back to the original names.

<http://www.epaosc.org/sites/7555/files/Dimock%20status%20update%20statement%20March%202012.pdf>

Please upload these to your website, replacing what's currently up. Please let me know when that is done.

This third pdf is from another site. Is this under another name on your page:

[http://www.epaosc.org/site/doc\\_list.aspx?site\\_id=7555](http://www.epaosc.org/site/doc_list.aspx?site_id=7555) ? If so, please replace it with this version. If it is not up, let me know and I'll send this to HQs to upload.
